

- ii. Received without the Letter of Authorization
- iii. Are found with suppression of details
- iv. With incomplete information, subjective, conditional offers and partial offers submitted
- v. Submitted without the documents requested in the checklist.
- vi. Have non-compliance of any of the clauses stipulated in the RFP
- vii. With lesser validity period

All responsive Bids will be considered for further processing. Udyog Mitra, Department of Industries, Bihar will prepare a list of responsive bidders, who comply with all the Terms and Conditions of the Tender. All eligible bids will be considered for further evaluation by the Evaluation Committee according to the evaluation process defined in this RFP document. The decision of the Committee will be final in this regard.

4. Detailed Requirements

4.1 Overview

Department of Industries, Bihar executes many schemes for all the major sectors in order to achieve a comprehensive industrial and entrepreneurship development in the state. In order to facilitate resolution of difficulties being faced by investors during establishment and operation of industries in Bihar, Udyog Mitra, Department of Industries, Bihar aspires to build an AI driven intelligent system to drive a faster and accurate decision-making for government policies, schemes, grants and subsidies to entrepreneurs.

The purpose of putting an intelligent system is to enable citizens to access public information with ease on policies, resources to start business and public information to enable entrepreneurial journey. It will also provide the citizens with frictionless access to government services and resources, thus boosting citizen participation and engagement.

Department of Industries generates lots of data across multiple schemes and departments, which can potentially be utilized to build an AI driven intelligent system to promote faster and accurate decision making across multiple levels of government agencies.

4.2 Scope of Work

MSME MIS

- To create a Centralized/ Integrated platform for the MSMEs of Bihar
- Integration of all available portals of Department of Industries, Ministry of MSME ,GoI, and corporation , society, Institutions which operates under the aegis of Department of Industries for centralized access of data and scheme.

- Create dashboard for different analysis and data visualization of MSME sector for reporting purpose with download features in excel, CSV, , word and pdf file.
- To onboard all the MSMEs with unique identification number through registration and documentation in the state in the convergence of Udyam Registration Portal of GoI.
- Create different kind of directory, resource based library for easy access of information about the MSMEs policy/guidelines/modules/Government notification etc.
- Integrate Link of various line department and e-commerce portal to showcase the products and services of MSMEs, to expand their market reach and ease of access of products and services.
- Real-time data retrieval based on various categorical filters from the scheme portals of the Ministry of MSME, Ministry of Textiles, Ministry of Food Processing Industries, and other line departments of Bihar and GoI.

HRMS

- Human Resource Management through HRMIS data: Portal will be designed for monitoring and supporting Human Resource of the departments, and therefore, it will include an HRMIS. HRMIS typically focuses on managing human resource-related data such as employee records, payroll, attendance, and performance management. While important for businesses it is also very much required to manage the district and state level employees of Department of Industries.

TMIS

- Training and Capacity Building: The Integrated portal will provide access to training programs, workshops, and skill development courses to enhance the capabilities of MSMEs. These training module will cover topics such as entrepreneurship, marketing, financial management, technology adoption, and compliance with regulatory requirements and others.
- Training related payment features to be integrated.

Grievance Redressal

- The portal will include mechanisms for addressing grievances or complaints faced by MSMEs. There would be a dedicated section for filing complaints related to delayed payments, non-compliance by buyers, or any other issues. The portal can facilitate the resolution process by directing complaints to the MSEFC and relevant authorities or agencies responsible for dispute resolution.
- Real time Integration with Single window system, ODR platforms, TReDS and other grievance redressal mechanism.

Integrated Job Section with Automated Resume builder

- Integrated job section will aim to provide an interface for job seekers of state to have an opportunity to apply for jobs in MSME sectors, this section also include AI Based builder based on user fed data.
- Feature of on-boarding job seekers by various MSMEs through AI integration.

- Feature of listing of jobs by enterprises and department.

4.2 Software Modules (Portal and Mobile Application)

MSME MIS

- Public access for MSME and Non-MSME entity
- Integrated Dashboard for MSME & All Schemes of State and Central Government by creation of separate database for department .
- Real time updation in the database for all Schemes and policy of State and Central Government.
- DIC Profiling
- Registration form for all MSME (Entry/Update/Deletion Records)
- User Creation for all MSME and Update/deletion Records.
- User creation for District, Subdivision, Block, Panchayat and as per requirements.
- Data updation as per the need.
- Award & Recognition features
- Report should be in PDF and Excel (should be able to be filtered as per requirements).
- MIS should be hierarchy based (District/Block/Panchayat and as per requirement based)
- Geo tagging and GIS Mapping of all MSME Unit/Clusters/IAs/ Lands/SEZ etc
- Job Module for MSME (Labor Pattern, Job Posting)
- Demand and Supply module (Raw Material, Manufacturing Products, Export/Import Analysis, Sell Analysis)
- Directory for Exporter/Importer and linkage with GoI entities.
- Integration of manufacturing units and wholesaler (Feature: wholesaler can view the catalogue and pricing of products and order through the Portal)
- Sector wise training module
- Update MSME information as per required
- License and Utility for Other Departments
- Communication Via Email and SMS
- Credit Linkage Feature
- Cluster MIS
- Creation of e-commerce website for department and its linkage with ONDC and other e-commerce portal.
- IPR, Trademark, FSSAI, copyright etc information gathering and its linkage with GoI entities.
- DPR and Incentive Calculator.
- Data Collection and Reporting: Tools to collect data from registered MSMEs on various aspects such as financial performance, employment, production capacity, exports, and compliance with government regulations.
- Compliance Monitoring: Features to monitor compliance with regulatory requirements, including tax payments, environmental regulations, labor laws, and business licensing.
- Financial Monitoring: Tools to track financial indicators of MSMEs, such as revenue, profit margins, liquidity ratios, and debt levels.
- AI-based data generation on the performance of MSMEs, with identification and flagging of MSMEs that are under stress and in need of support.

- Data Analysis and Visualization
- Alerts and Notifications: Capability to send alerts and notifications to government agencies and MSMEs regarding important deadlines, compliance issues, and policy changes.
- Forecasting and Demand Planning: Tools to forecast future demand for products or services based on historical data, market trends, and other factors, helping MSMEs optimize production and inventory levels.
- Other features required for the department which are not mentioned.
- Integration of Payment gateway wherever necessary
- Step by Step Bilingual Videos on How to Apply Policies with Flow Diagram Illustration
- Integration of Trade Fair and Exhibitions Module for national and International trade fair information.
- AI based bilingual voice assistance chat bot.

Training Management Information System

- Trainer Details Entry,
- Course Management Add Subject Area, Modify Subject Area, Delete Subject Area
- Learner Registration and Enrollment
- Training type Define (online, offline),
- Add venue details,
- Secluded Training,
- Attendance Marking through biometric device
- Certificate Generation and Feedback from Entry,
- All Training Docs uploads.
- Communication Via Email and SMS
- Assessment and Evaluation
- Training Calendars
- Reporting and Analytics: Capability to generate reports on training activities, learner progress, completion rates, and assessment results.
- Other features required for the department which are not mentioned.
- Training related payment features.

HRMS for Industry Department Employee.

- Employee Profile Creation /update/delete.
- Attendance Report.
- Leave Module Created.
- Tour Management Module Created.
- Holiday Showing.
- Payroll Management.
- Manage Assets.
- Quarterly Progress Report for Employee.
- Various type of Report.
- Performance Management System
- Communication Via Email and SMS
- Role Management
- Biometric integrations
- Recruitment and On boarding

Fg

- Reporting and Analytics:
- Other features required for the department which are not mentioned.

Grievance and Feedback:

- Apply Grievance
- Grievance Sources (Email, SMS, Chat, Call etc.)
- Escalation Matrix Feature
- Multi level user management
- Grievance resolved in time frame
- Track Grievance with Turn Around Time
- Feedback feature
- Generate Report as per requirements
- Notification Features
- Communication Via Email and SMS
- Bulk Messaging
- Other features required for the department which are not mentioned.
- Integration of Grievances Portal with ODR, TReDS and other grievance redressal platform.

Integrated Job Section with Automated Resume builder

- Integrated job section will aim to provide an interface for job seekers of state to have an opportunity to apply for jobs in MSME sectors, this section also include AI Based builder based on user fed data.
- Feature of on-boarding job seekers by various MSMEs through AI integration.
- Feature of listing of jobs by enterprises and department.

General Reporting

- a. All modules of the solution comprises of comprehensive reporting facilities with standard reports that confirm to the best practices and benchmarks of related functional area
- b. Dynamic and interactive reporting using prompts to allow end users to select filter conditions to be used at run-time
- c. Each report header/footer includes in minimum the title
- d. Able to run the reports in a browser based environment
- e. Offers ad-hoc Analysis allowing end users to create additional reports based on existing attributes and metrics or create new ones to address specific reporting needs
- f. Able to seamlessly export data into Microsoft Excel or MSword for further analysis and extended reporting

- g. Able to carry out multiple sorting and apply extensive selection criteria
- h. Able to provide details/summarized reports and cross analysis of each module and sub module of the solution
- i. Each report offers category totals and grand total figure wherever applicable/specified
- j. Able to print report at any stage before final closing
- k. Business Intelligence and Analytical reporting
- l. Data Analysis and Visualization: Analytics tools to analyze MSME data and generate insights through visualizations such as charts, graphs, and dashboards.
- m. Automatic Insights Generation
- n. Other features required for the department which are not mentioned.

Data Management:

Compatible with a wide range of data sources, including cloud-based and on-premises databases, Excel spreadsheets, and third-party services, allowing users to aggregate and visualize data from multiple sources.

- a. Support integration with existing or market leading data preparation/ management platforms
- b. Functionality for admin users to create new dimensions, derived metrics etc.

Access Management:

- i. Capability for access control through SSO, RBAC, RLS and OLS
- ii. Create audit logs and monitoring framework for admin and super admin for admin to create audit logs and monitor.

Application Security Audit

- a) Department of Industries of Bihar will perform the following tasks for website and the application Security to analyze and review the website/application security through a Certified Auditor. The cost of the certification will be borne by Dept of industries of Bihar. The auditor will have to carry out Functional Test, Load Test (approx. 100 concurrent users at peak time) along with assessment of the vulnerabilities, threats and risks that exist in the developed Application.

- b) The scope of the proposed audit tasks is to check various web attacks and web applications for web attacks. The various checks /q attacks / vulnerabilities should cover the following or any type of bug attacks, which are vulnerable to the Web-application.
- c) Vulnerabilities to SQL Injections
- d) Application Security Audit
- e) Penetration Testing (both manual and automatic)
- f) Configuration Testing
- g) Database Server Controls
- h) Network security
- i) Patch assistance
- j) Directory Traversal
- k) Authentication hacking/attacks
- l) Password strength on authentication pages
- m) Scan Java Script for security vulnerabilities
- n) File inclusion attacks
- o) Exploitable hacking vulnerable
- p) Web server information security
- q) Cross site scripting
- r) HTTP Injection
- s) Phishing a website
- t) Buffer Overflows, Invalid inputs, insecure storage, etc.
- u) Any other attacks, which are vulnerability to the website and web applications.
- v) Issuance of Certificate after compliances of all vulnerability.
- w) Capacity/ Load test
- x) 100% traffic trials on the network.
- y) Information System Audit should cover the following Policy, Procedures, Standard Practices& other regulatory requirements:
- z) CERT-In guidelines on Information Security.
 - aa) IT Act, 2000 and IT Act, 2008.
 - bb) Best practices of the industry including ISACA's Guidelines and ISO 27001
 - cc) Agency has to comply all the gaps/vulnerability mentioned in the security

audit within 15 days from the date of notification.

dd) Dept of industries of Bihar will offer for re-audit.

Portal and Mobile Application Maintenance

- a. The selected firm/agency for portal and mobile application development will provide technical support along with portal and Mobile Application maintenance throughout the project and 05 years after project completion. The operation and maintenance cost will be including in the cost of development. The party shall not demand additional cost for maintaining the portal till the contract period of the project.
- b. The selected firm/agency shall be responsible for user testing of portal, gathering feedback from its users and create changes accordingly in the portal during its implementation. For testing of portal, gathering feedback through survey the selected firm/agency will not create any additional demand in terms of cost and manpower from Udyog Mitra.
- c. The selected firm/agency shall ensure timely updation, managing all bugs reported in application software, incorporation of changes, fine-testing, installation and configuring, as well as back up of database.
- d. The selected firm/agency will provide operation and maintenance of the portal till the signed contract period between both parties.
- e. The selected firm/agency shall provide immediate response and support for database recovery, data synchronization after crash, performance tuning, and bug fix and follow up changes with users.
- f. The selected/agency shall follow up the users after training of the portal and will provide all technical support to meet all critical processing cycle in case of major changes in the portal.
- g. The selected firm/agency will provide the security and control features to prevent unauthorized and maintain database process control.

AI-Powered MSME Knowledge & Intelligence System

The platform shall incorporate an AI-driven knowledge and intelligence layer that ingests state and central MSME scheme documents, policy notifications, and programme guidelines to automatically generate structured training modules and contextual advisories for MSMEs and departmental users. The system shall capture real-time field data from MSME coordinator interactions including scheme recommendations, applications, approvals, and outcome tracking and structure this into a persistent knowledge graph that continuously feeds performance metrics on scheme effectiveness, institutional capacity, and Centre-State programme alignment, including GoI programmes such as RAMP under the Ministry of MSME. AI-based analysis of this data shall identify outreach gaps, flag underperforming geographies or sectors, and deliver actionable intelligence through the integrated MIS dashboard with communication via Email and SMS. The intelligence outputs shall remain linked to the TMIS to ensure training content stays current with policy changes without manual intervention.

NOTE –Time to time within project period, Udyog Mitra, Department of Industries, Government of Bihar may ask to include other schemes and Policies as well in proposed solution without any additional payment.

4.3 Functional Requirements

1. Best practice should be adopted to deliver the required features mentioned in 4.2
2. Develop a Dashboard to integrate schemes which fall under the preview of Department of Industries
3. The platform will serve the needs of different persons who would be interested in individual scheme view as well as an integrated view
4. Built-in ETL and/or strong Integration with leading data preparation platforms
5. Customizable data fields and columns
6. Drag & drop interface for data transformation & preparation
7. Data visualization like heat maps, geographical mapping etc. based on user specific features
8. Graphical data presentation with Geospatial support features
9. Allows end users to create their own dashboard views by simple drag & drop features
10. Drill down and Drill through capabilities (to various levels of a hierarchy)
11. Able to format (page size, row, columns, fonts, colors, etc.), allow data manipulation (slice & dice multidimensional data on the fly, pivoting, sorting, ranking etc.)
12. User friendly GUI to allow exporting capabilities in different formats (PDF, CSV etc)
13. Ability to publish the reports to a portal or website (internal or public)
14. A browser-based interface to view reports
15. Cross-device access
16. Automated data refreshes
17. Option to deploy on-premises
18. Supports object level as well as row level security
19. Performance reporting / monitoring
20. Successful ventures from different schemes can be fetched from portal.
21. Forecasting based on Industry data availability
22. The language of input query and display of data & information should be English. It would be preferred for displaying data in Hindi as well wherever the underlying data provided is also Hindi

23. The platform shall support automated AI-based ingestion and parsing of scheme documents and policy guidelines to generate structured, role-specific training and advisory content without manual intervention, with outputs linked to the TMIS module.
24. The system shall maintain a persistent knowledge graph derived from MSME Coordinator field interactions, measuring scheme effectiveness, institutional strengthening, and Centre-State collaboration indices, with drill-down visibility across state, district, block, and panchayat hierarchies.
25. AI-generated gap analysis and performance reports shall be auto-generated from real-time field data and accessible through the integrated MIS dashboard with export in PDF, Excel, and CSV formats.

4.4 Platform and Mobile Application Specifications (IOS and Android Based)

Some specifications requirements for the Platform are as below:

Tool Installation	
On-premises option	Desktop and individual use on developer machine and publish to on-premises server
Data Connections	
Multiple Data source support	Support a variety of data sources including: • File-based data sources (Excel, flat files like CSV, XML, JSON) • Databases like SQL, No SQL and Cloud • Google Analytics, etc. • Other data sources like web pages (through scraping), REST APIs etc.
Flexible data connection profiles to Data Source	Support both live connection to the data source and extraction into an in-memory, columnar database.
Full and Incremental Data Extraction	Support scheduled full data extraction and incremental data extraction with minimal development efforts
Memory Optimization	Support dynamic loading of relevant segments of data into memory
Multiple Data Source Connections & Cross Database Joins	Must support connecting to multiple data sources at the same time to support both data blending and cross database joins
Metadata Management	Dimensions and implicit measures are automatically generated based on the data type without manual categorization with provision to create additional dimensions and measures in the metadata
Geospatial Data	Support geospatial data by using longitude and latitude of countries, states/provinces and cities without scripting
Exposing OLAP objects	When connecting to an OLAP data source (SQL Server Analysis Services, SAP BW, etc.) the OLAP-specific objects such as hierarchies, calculated measures and members, sets. will be loaded as per the source

Ty

End-user Functionality	
Single Integrated Tool	Must provide one tool and a single user interface for end-to-end analytics functions - ad-hoc analysis, visualization, reporting, dash boarding to publishing
Querying through common language	Must have the option of conversation using natural language for user to be able to ask queries and receive response
Web Authoring	Must be designed for business-user-authored data discovery and dashboards
Disconnected	Must support disconnected analysis
Intuitive Interface	Shall be easy to use and intuitive on Web Portal as well as the Mobile Application (Compatible with IOS & Android)
Best Practices Data Visualization	Shall automatically select the best visual graphs based on the fields selected by the user.
Interaction Paradigm	Shall support direct interaction with graphs by dragging and dropping what users want to see
Sorting on visual Graphs	Able to sort the data automatically or manually on the visual graphs
Threshold	Shall be able to define thresholds and any value over the threshold shall be highlighted (i.e. red bold font, colors, shapes in chart)
Hovering Information	Information shall be displayed when the user is "hovering" over a specific area on a map, a chart, a table or a report.
Data Driven Alerts	Sends email alerts on defined thresholds
Tooltip Selection	Select categories in your tooltips to easily identify related marks in the view

Usability – Graphs, Maps	
Brushing	Ability to filter and pass parameters directly from a graph to another by clicking on drawn objects
Conditional Formatting	Able to provide a color-coded summary of the state of a particular metric compared to a goal or threshold target without scripting
Statistics	
Trend Line	Support automated generation of trend lines to show if there is any correlation between 2 variables
Support Statistical tools	Support R, Python etc to generate statistical visuals

Distribution and Sharing	
Automated Scheduling and Distribution	Provide analytic content to end users on an on-demand and scheduled basis. End user may subscribe to dashboards and receive an email with the dashboard attached in their email box on a scheduled delivery
API	Provides an API for integration with external web applications
Export to PDF	All dashboard, maps, graphs, tables and reports can be exported to PDF
Export to Excel and CSV	Tables, Reports and graphs can be exported to Excel or in a CSV format
Export as a Picture	Graphs, Maps, Tables, Reports and all dashboard pages can be exported in a picture format

4.5 Hardware, Website Hosting and database

The hosting platform shall be provided by Dept of Industries, Bihar in Bihar State Data Centre.

5. Evaluation Criteria

5.1 Pre-Qualification Criteria

S.N.	Basic Requirement	Specific Requirements	Documents Required
(i)	Legal Entity	The bidder should be— Incorporated under the Indian Companies Act, 2013 or any other previous company law as per section 2 (20) of the Indian Companies Act 2013 or Partnership firm registered under Limited Liability Partnerships (LLP) Act, 2008 or Partnership firm registered under Indian Partnership Act, 1932 Registered with the GST Authorities Company should have a valid PAN Registered in EPF	a) Incorporation Certificate of the Company/ LLP / Registration Certificate of the Firm. b) Memorandum of Association & Article of Association/ Partnership deed. c) PAN d) GSTIN Registration. e) EPF &ESI (If applicable) Registration.
(ii)	Years in Operation	The bidder should have been in operation for a period of at least 10 years in India prior to the date of submission of bid.	a) Incorporation Certificate of the Company/ LLP b) Copy of ITRs.
(iii)	Annual Turnover	The bidder should have an annual turnover of at least ₹ 7 (Seven) Crores IT/ITeS Services in	a) Audited financial statements for the relevant financial
